

南开大学

RE Challenge

(汇编语言与逆向技术实验 7)

姓名: 申宗尚

学号: 2213924

专业: 信息安全

一. 实验目的

- 1、熟悉静态反汇编工具 IDA Freeware;
- 2、熟悉反汇编代码的逆向分析过程;
- 3、掌握反汇编语言中的数学计算、数据结构、条件判断、分支结构的识别和逆向分析

二. 实验环境

- 1、ida64
- 2、challenge.exe

三. 实验原理

通过 IDA Freeware 可以得到二进制代码的反汇编代码，如图 1 和图 2 所示。

```
.text:00401000 ; =====

.text:00401000 public start
00000400 00401000: start (Synchronized with Hex View-1)

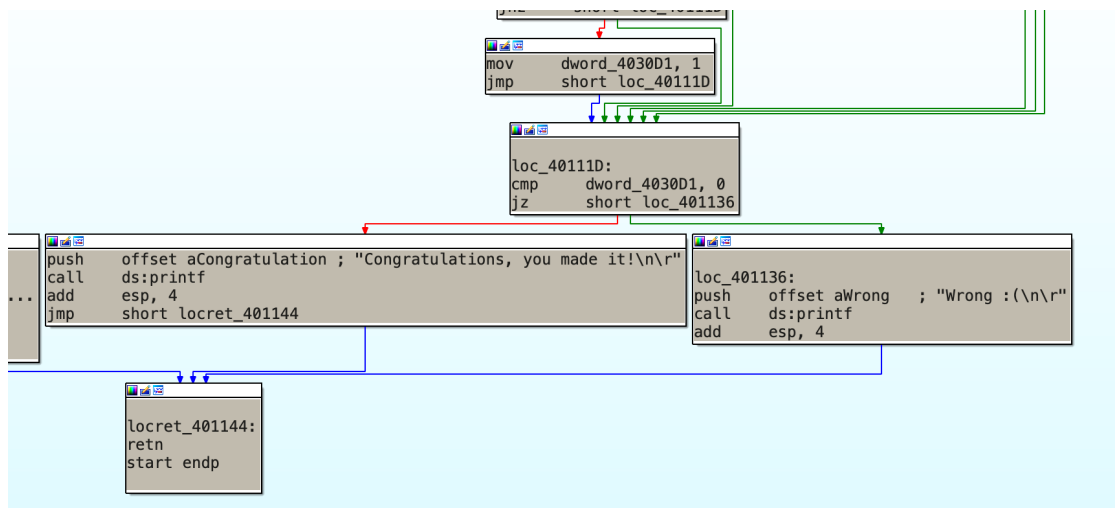

```

源代码见附件。

从而，我们可以通过对该反汇编代码的计算过程、数据结构、条件判断、分支结构等信息进行分析，逆向推理出程序的正确输入数据，完成逆向分析挑战。

由代码分析可知，要实现目标字符串“Congratulations, you made it!”的输出，需要满足指向该输出代码块所在代码块的条件

寻本溯源，在程序的最开始的输入代码块中，需要输入一个字符串：

```

public start
start proc near
push    offset Format    ; "Please enter a challenge: "
call    ds:printf
add     esp, 4
push    offset Str
push    offset aS        ; "%s"
call    ds:scanf
add     esp, 8
push    offset Str        ; Str
call    ds:strlen
add     esp, 4
cmp     eax, 6
jb      loc_40110D

```

```

loc_40110D:
push    offset aTheChallengeMu ; "The challenge must have at least 6 char"...
call    ds:printf
add     esp, 4
jmp     short locret_401144

```

```

push    offset aPleaseEnterThe ; "Please enter the solution: "
call    ds:printf
add     esp, 4
push    offset dword_4030AD
push    offset dword_4030A9
push    offset dword_4030A5
push    offset dword_4030A1
push    offset aUUUU        ; "%u-%u-%u-%u"
call    ds:scanf
add     esp, 14h
cmp     eax, 4
jb      loc_40111D

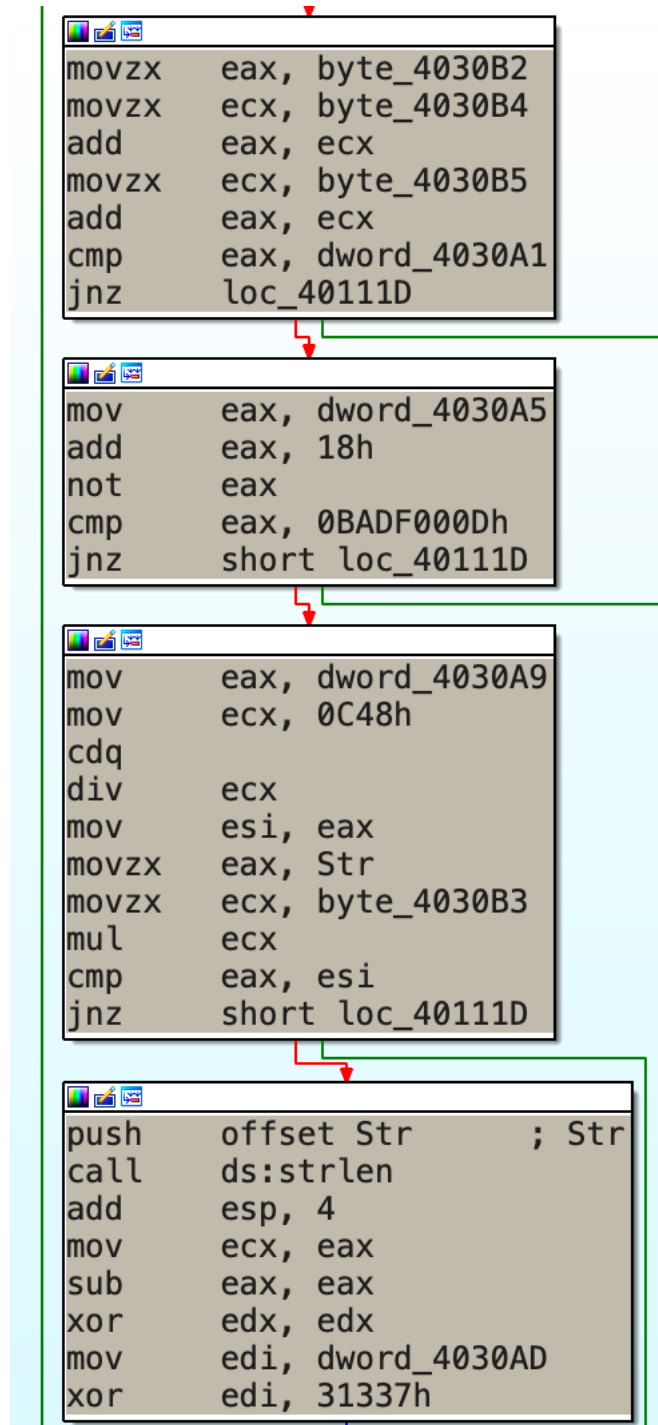

```

该输入代码块实现的功能有：

- 1、调用 printf 函数，输出 “Please enter a challenge”，提示用户输入一个字符串
- 2、调用 scanf 函数，将用户输入的字符串存入 Str 中
- 3、调用 strlen 函数，获取 Str 中字符串的长度，将其与数字 6 比较，如果长度大于等于 6，则进入下一段代码块，否则提示输出“The challenge must have at least 6 char...”
- 4、从而得知，该程序需要输入一个长度至少为 6 的字符串，故本程序选择 000000，作为测试输入。
- 5、在成功输入 000000 作为 Str 后，跳转到下一代码块，该代码块首先调用了 printf 函数，

输出字符串“Please enter the solution:”，提示用户输入测试 challenge 的答案

- 6、随后调用 scanf 函数，将用户输入的“%u-%u-%u-%u”型字符串（%u 为无符号整数）依次存入 dword_4030A1、dword_4030A5、dword_4030A9、dword_4030AD 为起始的数据段，以进行下一步操作。

- 7、在其次的操作中，依次对前后四位%u 的每一个进行正确性的检验。
- 8、在第一个代码块中，将用户输入的 Str 的第 2 位的 ASCII 码存入 eax，再将 Str 的第 4

位存入 ecx，随后将 eax 与 ecx 相加（结果存在 eax），将 Str 的第 5 位存入 ecx，再将 ecx 与 eax 相加存入 eax，此时，eax 的结果是第 2，4，5 位 ASCII 码相加的和，程序将其与第一个 %u 进行比较，从而可以得出，答案的第一部分应该是 2，4，5 位 ASCII 码和对于字符串 000000， $48+48+48=144$

从而可以得出，答案第一个数值应该是 144

- 9、在第二个代码块中，首先让第二个 %u 数据存入 eax，加 18h，再将其取反，随后与数据 0BADF000Dh 做比较，相等进入下一位比较。从而可以反推出：第二个数据位应该是 0BADF000Dh 取反后 -18h 得到的结果，计算过程如下

0BADF000Dh=1011 1010 1101 1111 0000 0000 0000 1101

对其取反得到 0100 0101 0010 0000 1111 1111 1111 0010

将其转为 16 进制得到 4520FFF2

将其 -18h 得到 4520FFDA

将其转为 10 进制，得到 1159790554

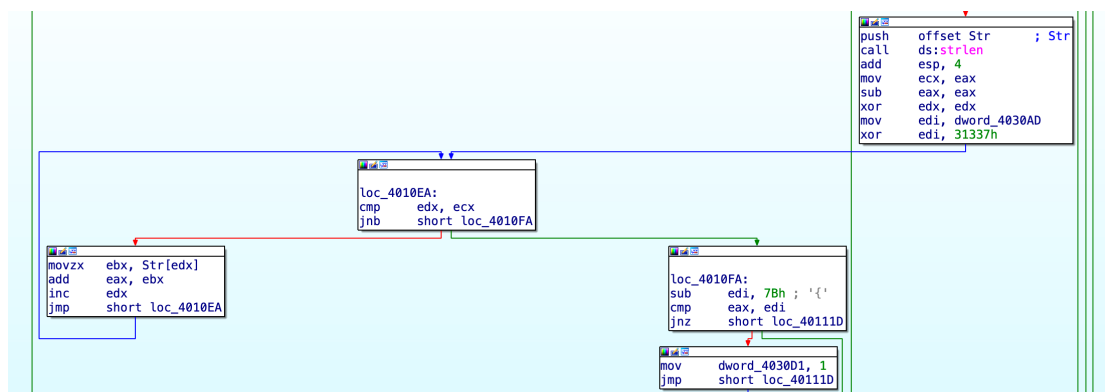

从而可知，第二个数据应该是 1159790554

- 10、在第三个代码块中，将第三个 %u 数据存入 eax 中，除以 ecx 中存储的 0C48h，将结果存入 esi 中，然后将 Str 的第 1 位和第 3 位分别存入 eax，ecx，相乘结果存入 eax，最后将 eax 与 esi 相比，如果相等程序继续进行，从而可以推知

$\%u/0C48h = Str[1] * Str[3]$

即 $\%u = Str[1] * Str[3] * 0C48h$

从而对于 000000， $\%u = 48 * 48 * 3144 = 7243776$

- 11、在第四个代码块中，首先先将各个寄存器清零，再将第四个 %u 存入 edi，与 31337h 异或。随后按照 Str 的位数进行循环（对于 000000，共循环 6 次，edx 作为循环变量）。每次循环时，将循环的 Str[edx] 加入 eax 中，最后，eax 的值应该是 Str 的所有字符的 ASCII 码

之和。最后，将 edi 减去 7Bh，与 eax 比较，如果相等，则继续进行，从而可以推知：

$edi - 7Bh = eax$

即 $(\%u \text{ xor } 31337h) - 7Bh = eax$ (ASCII SUM)

从而，%u 应该等于 Str 的所有字符 ASCII 之和+7Bh，再与 31337h 异或，计算过程如下：

对于 000000， $eax = 48 + 48 + 48 + 48 + 48 + 48 = 288$

$288 + 7Bh = 411 = 110011011$

$110011011 \text{ xor } 31337h = 110011011 \text{ xor } 110001001100110111 = 110001001010101100$

$= 201388$

综上，第四个数值为 201388

12、由以上分析，可以得出，对于输入字符串 Str=000000，所对应的 solution“%u-%u-%u-%u”应该为 144-1159790554-7243776-201388，下为程序运行截图：

```
C:\Users\dell>"C:\Users\dell\Documents\WeChat Files\wxid_1brx76zuvp3e22\FileStorage\File\2023-12\e841ea42425fe406d0569ab879f0b73_23c396d3a8d932a81af783d2a7bcc9c5_8.exe"
Please enter a challenge: 000000
Please enter the solution: 144-1159790554-7243776-201388
Congratulations, you made it!

C:\Users\dell>
```

再对输入字符串 Str=abcdef 进行示例，所对应的 solution“%u-%u-%u-%u”由上述的分析，经计算应该为 299-1159790554-30191832-201191，下为程序运行截图：

```
C:\Users\dell>"C:\Users\dell\Documents\WeChat Files\wxid_1brx76zuvp3e22\FileStorage\File\2023-12\e841ea42425fe406d0569ab879f0b73_23c396d3a8d932a81af783d2a7bcc9c5_8.exe"
Please enter a challenge: abcdef
Please enter the solution: 299-1159790554-30191832-201191
Congratulations, you made it!

C:\Users\dell>
```
